December 22, 1982

Alderman B. Hinkley, Chairman,
And Members of the Parks and Recreation Committee

Dear Alderman Hinkley

On September 14, 1982, City Council approved Item No. 2 of the Sixteenth Report of the Finance Committee, as adopted by the Parks and Recreation Committee, to appoint Pannell Kerr Forster Campbell Sharp, Management Consultants, to undertake a marketing study to determine the total net revenue for the operation of the proposed Trade Centre/Arena with and without a National Hockey League franchise. In accordance with your request and in conjunction with the Trade Centre/Arena Subcommittee, we have undertaken a review of this report and wish to offer the following comments.

A report was submitted to your Committee in June 1982 in which we developed schedules to indicate the cost to the taxpayer if the facility were to be proceeded with based on the assumptions provided in the I.B.I. Report. The projections made at that time, based on the I.B.I. Report, indicated the City had the financial capability to proceed. The I.B.I. Report, unfortunately, was two years old and had been prepared to indicate the net revenue on operation for various sized buildings ranging from 6,400 seats to 18,000 seats. In addition, a change had taken place in the economy of not only our City but the country since the I.B.I. Report was prepared, and for these reasons, Council requested an updated marketing report on the 18,000 seat facility being proposed.

Schedule "A"

You will recall when this facility was first contemplated, the only money allocated towards the project was an indication from the Federal Government for assistance in the amount of \$4,000,000. In the Report of June 1982, we advised that we had in our reserve for this project some \$6,592,000. From this schedule, you will note as at December 31, 1982, we will have on hand some \$9,508,000.

Schedule "B"

In the June 1982 report, it was indicated total cash receipts towards the project, when completed, exclusive of debt financing, would amount to \$22,893,000. From the attached Schedule "B", you will note this amount has been revised to \$24,913,000 which represents almost 60% of the estimated cost of the project. You should, however, make reference to Section (a) of Schedule "B" in which you will note the actual amount confirmed is \$18,649,000. Section (b) and (c), while the amounts appear realistic, they are subject to confirmation.

Schedule "C"

Included in the Pannell Kerr Forster Campbell Sharp Report is a Summary of Financial Results indicating the net operating position of the facility under four different scenarios. For comparative purposes and presentation in this report, we have rounded their amounts to the closest \$1,000 and excluded the sections of their report which indicated the net profit with an O.H.L. only and an N.H.L./O.H.L. only in order to comply with the original terms of reference which requested information with or without an N.H.L. franchise. Under each scenario, their report shows four different assumptions with or without beer sales and the concessions operated internally or externally. For ease of presentation, the following Schedules "D" to "G" have been prepared on the net operating position based on the assumptions concessions will be operated internally and showing a comparison whether beer is available or not.

Schedules "D", "E", "F" and "G"

It should be noted in Schedules "D" to "G", the following remain constant:

1. The total amount to be debentured is \$17,787,000.
2. The rate of interest for the issuance of debentures is 13% for a twenty year term.
3. The one mill special levy is in effect for each of the years 1982 to 1985.

The only variance in these schedules is the amount to be borne by taxpayers after the absorption of debt to be financed from the operation of the facility. Based on the four variables, you will note the net cost to the taxpayer with an assessment of \$5,000 would range from a low of \$4.50 with an N.H.L. franchise to a high of \$13.00 without hockey.

Schedule "H"

When the Capital Budget was approved by City Council in March of 1982, it was assumed the gross amount to be financed by debentures would be \$25,582,000. The revised amount, subject to confirmation of Council, as shown on this schedule under Column (2), is \$17,787,000, or a reduction of \$7,795,000 since March of this year. In these revised schedules, we are estimating the financing, which was scheduled to commence in 1982 for the project, can now be deferred to 1985. The lower portion of Schedule "H" shows the reduction in the early years of the percentage of debt charges to levy and also as a percentage to the total budget. This revised schedule of financing will delay the burden for debt on the taxpayer until 1986 or the first full year of operation.

Schedule "I"

While the Consultants' Report includes positive statements as to the economic impact in the City if the project is proceeded with, we are also including, for your information, a letter we received from Mr. John Morand, Director of Economic Development, providing his estimate of the economic impact of proceeding with this project.

Schedule "J"

This project has been under review by City Council since June 24, 1980 and with the changes in the composition of Council, we thought it advisable that documentation be made in summary form on the steps taken by City Council in order to reach a decision as to whether the facility should be proceeded with or not. This summary, to the best of our knowledge, makes reference to the various dates on which action was recommended by Council or a Committee of Council.

Summary

It is our opinion, based on the comments and assumptions as reported in the I.B.I. Report and the comments of Pannell Kerr Forster Campbell Sharp Marketing Report, "As a result of our study we believe that market conditions generally support the development of a major arena facility in Hamilton", that the City has the financial capability to proceed with this project without placing an undue burden upon the taxpayers of the City of Hamilton.

Our analysis of the Consultants' Report indicates that under the worst scenario resulting debt charges from this project, together with the other projects contemplated in the Capital Budget, will not exceed the self-imposed limit of 15% of the adjusted levy as outlined on Schedule "H". Reference to this schedule indicates the high in 1986 is only 14.08%. We are of the opinion, because of the firm financial commitment to the project by not only the City but the senior levels of Government, the net cost to the taxpayer could be less than forecasted in this report. The Provincial and Federal Governments are announcing incentive programs to create work and there is a possibility this project could be included under one of these programs. While it is difficult to define the actual dollar value, the report of the consultants and the letter of Mr. Morand clearly indicate the project will have a beneficial effect on the economy of the City during construction and after completion of the project.

You will recall in the June report, it was also indicated there was a possibility the revenue from advertising could be increased and we are led to believe this additional source of funding might still be available.

It should be noted these statements have been prepared on the assumption the gross cost for the project will not exceed the original estimate of \$42,700,000 and is subject to confirmation by the architectural consultants, Parkin Partnership.

Recommendations for Consideration by the Parks and Recreation Committee to City Council

That the Parks and Recreation Committee recommend to City Council for its meeting of January 11, 1983:

1. The City Solicitor be requested to make application to the Ontario Municipal Board for approval to proceed with the project at a cost not to exceed \$42,700,000.
2. That the Finance Committee be requested to recommend to City Council the method of financing.

Yours very truly

W. H. McFarland
Treasurer and Commissioner of Finance

MEMORANDUM

TO: Webb McFarland
Commissioner of Finance

FROM: Arie Ashkenazy
Economic Development Department

RE: Economic Impact of the Construction Phase of the Arena/Trade Center

1.0 Background

The proposed Arena/Trade Center has the following main elements:

- a. Seating capacity of 18,000
- b. 60,000 sq. ft. of exhibit space
- c. Cost of 42.7 million dollars

The structure is to be composed of steel and concrete.

2.0 Analysis

a. Direct impact

Approximately 50% of the total cost will have to be paid in wages and salaries. This amounts to 21 million dollars and corresponds to 840 man years of employment. Out of the remaining 21 million, we estimate that 75% will be spent on steel. This amounts to 16 million dollars, assuming that steel will be provided locally. This will result in 213 man years of employment created in the steel industry.

2.0 Analysis - Continued

b. Indirect impact

The income generated by the construction of the Arena/Trade center will filter down the local economy. The increased demand for steel products plus the spending power of the people employed in the steel mills will create a similar amount of other jobs locally, 213 man years of employment. The additional income received by the construction workers will result in more jobs in other sectors of the local economy, 400 man years of employment.

3.0 Summary

The construction of the proposed Arena/Trade center is estimated to create employment as follows:

- a. Construction - 840 man years of employment
- b. Steel industry - 213 man years of employment
- c. Indirect effects - 613 man years of employment

TOTAL of 1666 man years of employment

TRADE CENTRE/ARENA COMPLEX
SUMMARY OF ACTION TAKEN BY CITY COUNCIL

Council Approval
Date

Summary

June 24, 1980
(Section 7 of the
32nd Report of the
Board of Control)

Approval of appointment of the I.B.I. Group, Professional Consultants at a total cost of \$94,500 to carry out detailed Stadium/Arena Feasibility Study. The cost of this study, including in-house expenses, will be subject to a 50% grant from Province of Ontario. City's share to be financed by transfer from Contingency Account.

September 30, 1980
(Section 1 of the 18th
Report of the Parks
and Recreation
Committee)

That, subject to appropriate funding arrangements with the Federal and Provincial governments, the City proceed with construction of Arena/Trade Centre at estimated cost of 39 million-48.3 million escalated (recommendation approved in principle, pending outcome of Federal/Provincial fund sharing negotiation)

February 24, 1981
(Section 1 of the 5th
Report of the Parks and
Recreation Committee)

- A) That City reaffirm its intention to, subject to appropriate financing, proceed with construction at a minimum total value of \$16,000,000
- B) That the offer of the Government of Canada to contribute \$4,000,000 be accepted
- C) That City purchase from the Federal-Provincial-Municipal Partnership 126,671 square feet of land for site in Phase Six of Lloyd D. Jackson Square

February 24, 1981
(Section 11 of the 5th
Report of the Finance
Committee)

That \$127,000 required for acquisition of land from the Federal-Provincial-Municipal Partnership be financed from the Reserve for Property Purchases, Account No. 0280-02.

TRADE CENTRE/ARENA COMPLEX
SUMMARY OF ACTION TAKEN BY CITY COUNCIL

Council Approval
Date

Summary

March 10, 1981
(Section 1 of the 7th
Report of the Finance
Committee and Section 1
of the 7th Report of
the Parks and
Recreation Committee)

Acceptance of the proposal of the I.B.I. Group
to undertake a study and analysis of various
alternatives respecting proposed Trade/Arena Complex
at an estimated cost of \$6,600 ... and that the
Provincial Government be requested to participate
in this study for 50% of cost and that additional
\$1,100 required be financed by transfer from
Contingency Account.

June 23, 1981
(Section 1 of the 16th
Report of the
Parks and Recreation
Committee)

A) That City Council approve, in principle, the
